

**Redefining  
Construction  
Into Rewarding  
Experience.**

**JAMC**  
J.A. Mevada Construction

# The Foundation

A space becomes more than just a piece of barren land when a robust infrastructure is constructed over it – wherein communities, business, and people thrive. It is on this solid foundation, JAMC is built with a view to redefine construction in a way that every space becomes a rewarding experience for those who inhabit, at a price that doesn't burn a hole in pocket.

JAMC treats every landscape as a blank canvas diligently filling up each corner with iconic structures and acute planning. We turn every possible stone to provide our customers with multi disciplinary services across construction value chain that ranges from planning, execution and post-construction activities.

We dig deep and have gotten our hands dirty in diverse industries, including Industrial, Residential, Commercial, Institutional & Other buildings of various scales. 40 projects in various industries and sectors later, we are constantly evolving and upgrading ourselves as we continue to provide superior value to our customers.

**Because at JAMC, the dust never settles.**

Space

# The journey so far

**JAMC was established in 1993** with humble means but huge aspiration of transforming and redefining the construction business. Since then, we have collaborated with the best of coterie and over the years have cemented our position as one of the most sought-after Construction Company in the country. We have grown leaps and bounds, both in terms of size of projects and our expertise.

Offering supreme quality work that provoke integrity and value is what the pedigree of JAMC is made of. We have stayed true to our humble beginnings and believe clients continue to choose us because of our experience and the greater value we provide in the way we deal with clients, architects, suppliers and sub-contractors with fine prowess. In our quest to always be customer-centric, we have earned quite a reputation for being an idealist when it comes to delivering the best to our clients and we, admittedly, do like to pat our back for achieving such a stature in the industry.

# Vision

Be the premier construction and project management organization by achieving extraordinary results for our customers.

# Mission

Our mission is to provide quality construction and customer satisfaction with advanced construction practice within stipulated time.

# Our Clients

**Parth** Engineers & Consultant
